

Welcome to your pharmacy plan

Here's a quick guide to your January 2019 benefits and how to get the most out of them

Here are your pharmacy benefits in a nutshell

We know you're busy, so we created a quick and easy guide to your benefits. It includes tips on how to make the most of your coverage and save money while you're at it.

First things first. Have you registered at bcbsga.com yet?

It's the fastest and easiest way to get all of your personalized pharmacy benefits information. At bcbsga.com, you can do things like:

- Find a pharmacy.
- Check your drug list.
- Compare drug costs.
- Switch to home delivery or refill a prescription.
- Check your claims status and history.
- Check your copay, deductible or coinsurance amounts.

There's an app for all of that, too. Anthem Anywhere makes it easy to manage your pharmacy benefits from wherever you are. You can find it at the Apple Store® (iOS) or on Google Play (Android).

Here's what your plan covers

- Brand-name and generic drugs on your drug list
- Some preventive drugs at little or no cost to you (view our Preventive Care flier at bcbsga.com/pharmacyinformation)
- Most specialty drugs if you have an ongoing health issue or serious illness

Specialty pharmacy

If you have a complex health condition that requires specialty drugs for your treatment — drugs that may need special handling or that you may get by injection or infusion — you'll need to get them through Accredo, our specialty pharmacy.* You may also be able to choose other in-network specialty pharmacies.

To view a list of covered specialty drugs, visit bcbsga.com/pharmacyinformation and select the **Exclusive Specialty Drug List**.

* Our home delivery pharmacy and Accredo Specialty Pharmacy are managed by Express Scripts.

Your drug list

Your plan uses the National Drug List. It includes hundreds of generic and brand-name prescription drugs.

You can get a sneak peek of your drug list at bcbsga.com/national4tier to see if a drug you take is covered. For more details, log in at bcbsga.com. If your drug isn't on the list, you'll see other options. Keep in mind, changes can be made to your drug list. So you may want to check it when you get a new prescription.

Drugs are grouped in tiers. Your share of the cost will depend on which tier your drug is on. The lower the tier, the lower your cost.

Your plan uses the Preferred Generics program. This means when there's a generic option available and you choose to go with the brand-name drug instead, you'll pay more. Check with your doctor to see if there's a generic option that's right for you — it'll save you money!

Want to save on drug costs? Here's how!

- Take medicines on your plan's **drug list**.
- Choose drugs on **Tier 1** for your lowest cost share.
- Find out if there are **generic or over-the-counter options** that may work for you.
- See how much your cost could be with our **Price a Medication** tool at bcbsga.com.
- Use a pharmacy **in your plan**.
- Get **90-day supplies** of the medicines you take regularly.

Remember to always talk to your doctor before making any change in your medicine.
